"We considered another bubble, a metal building and other fabric structure suppliers. Our engineer and architect strongly recommended that we choose Universal Fabric Structures to supply the new indoor practice field. The quality of the environment, lighting system and overall aesthetics confirmed we made the right decision. The Sporthall is now the focal point of our new practice facility. The players and coaches love it."

SPORTHALL®

The Universal Fabric Structures Advantages

Advantages vs. Metal Buildings

- 100% higher clear-span and 200% less expensive
- Much lower foundation costs and requirements
- Option for translucent panels which allow for natural light that can potentially save up to 65% on lighting costs

Other Advantages

- Pricing includes delivery, installation, engineering and support on your improved lot.
- Options to fit any budget
- ISO 9001:2000 Certified

Advantages vs. Air-Supported Buildings or "Bubbles"

- Virtually no operating costs compared to an average of \$10,000 per month for a "bubble".
- Unlike a "bubble", our buildings can be attached to conventional "brick and mortar" style construction to create any desired look.
- Superior design to shed snow & engineered to meet and exceed local wind load requirements.

"The Universal Fabric Structure team combined resources from sales, engineering and project management effectively and professionally to meet our exact needs."
