

## **Universal Fabric Structures, Inc. Introduces Their New Hercules Series!**

Quakertown, PA, April 1, 2008 – Universal Fabric Structures (UFS) is committed to being an industry pioneer in design, engineering and project management of fabric structure projects worldwide. UFS is constantly striving to be at the forefront of customers needs with solutions that are economical yet functional. UFS offers an industry-leading standard warranty of 25 years/Frame and 12 years/Fabric.

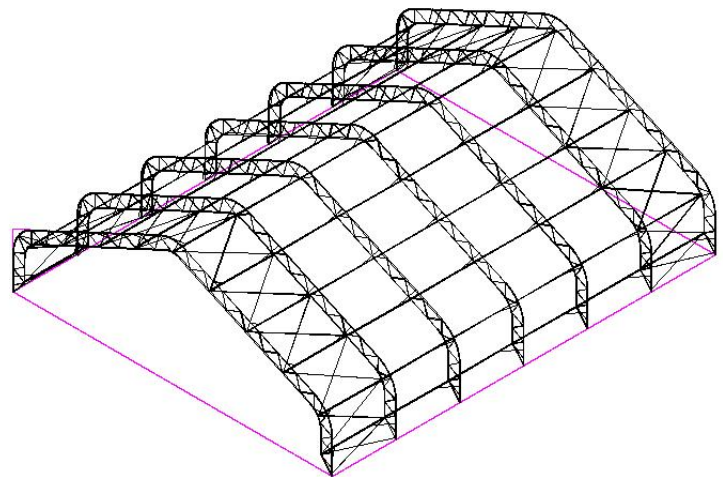

UFS markets both permanent and temporary solutions to a variety of end use markets from sports facilities to warehousing. UFS permanent facilities are designed for strength and durability meeting or exceeding building codes throughout the world.

To compliment the presence of UFS in the industrial markets, the company has introduced the “Hercules” series; a steel trussed fabric structure covered in premium PVC coated fabric. UFS defines the industrial market to include applications in Warehousing, Mining, Oil & Gas, Mineral Storage, Manufacturing, Environmental Remediation and Aviation. The Hercules structure was designed primarily to satisfy the industrial market need for a high quality, durable, industrial storage solution.

**The Hercules series has the following features:**

### **Specifications**

- Steel frame / Galvanized
- Width - 40' - 100'
- Length - Indefinite (20' modules)
- Height - 25' - 40'
- 22oz-24oz PVC-coated polyester scrim flame retardant fabric
- Designed to meet or exceed local building codes for all seismic and wind load requirements

## Characteristics

- Modular, expandable
- 100% relocatable
- Unobstructed clearspan space
- Limited maintenance required
- Flat gable ends or rounded bell ends are available
- Rectangular floor plan for optimum usable space
- Snow shedding capabilities
