The Atlantic Club

Indoor Tennis Facility
Manasquan, NJ

"One of the big advantages is that I never have to worry about the UFS buildings during inclement weather like I do with the air-supported structures we have. The UFS structures are extremely durable and when it comes time for us to replace the bubbles I will definitely recommend using the Universal Fabric Structures team again."

- Rick Laus, Real Estate Director
The Atlantic Club

Background

Due to increased member demand for more tennis courts, The Atlantic Club in Manasquan, NJ needed a quick solution. Since they had faced a similar situation back in 1999, they knew exactly who to call upon this time around. Universal Fabric Structures had designed and constructed a 118'x262' facility for The Atlantic Club in 1999 that is still in use today.

Scope of Work

The Atlantic Club was looking to mold their new facility after the existing 5-court SPORTHALL® structure. A wide 133-foot by 262-foot long structure

The need to include extra viewing areas was a concern, but an easy challenge for Universal Fabric Structures.

Solution

UFS made recommendations and received feedback from Atlantic Club personnel Kevin McHugh, C.O.O.; Clayton Taylor, Club Pro and Rick Laus, Real Estate Director. UFS suggested construction of a wider 133-foot by 262-foot long fabric structure over the five new tennis courts.

The wider space has allowed for the extra viewing area that was sought as well as offered areas that can be utilized for several other needs including private parties and club gatherings.

Inside The Atlantic Club Tennis Building 2, built in 1999.

Members of The Atlantic Club have raved about the new facility and the courts are booked months in advance. They especially enjoy the fact that the new facility is fully insulated to keep it cooler in the summer and warmer during the winter months. The insulation will also allow the facility to save on energy costs during the course of the year.

For over 25 years UFS has been offering quality structures engineered for sport and recreation facilities. The SPORTHALL® provides for a clean, bright, open air environment with the feel of being outdoors – the perfect solution for bringing an outdoor game or activity into an indoor environment. The custom shapes, aesthetically pleasing design, retractable wall systems, and translucent roof complement any surrounding to create a unique indoor-outdoor environment for year-round use. **SPORTHALL® - We've Got You Covered**
