

UFS is Looking for Dealers & Distributors

Universal Fabric Structures is looking for dealers & distributors throughout North America for our Hercules style structure. **Exclusive territories are available.**

Universal Fabric Structures (UFS) is committed to being an industry pioneer in design, engineering and project management of fabric structure projects worldwide. UFS is constantly striving to be at the forefront of customers needs with solutions that are economical yet functional.

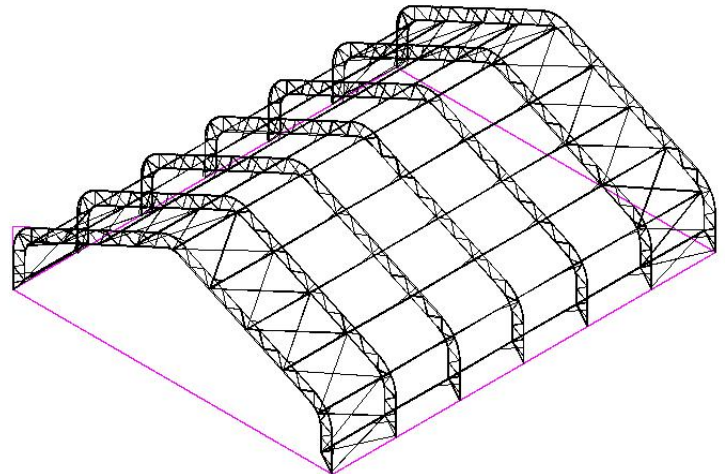

UFS markets both permanent and temporary solutions to a variety of end use markets from sports facilities to warehousing. UFS permanent facilities are designed for strength and durability meeting or exceeding building codes throughout the world.

To compliment the presence of UFS in the industrial markets, the company has introduced the “Hercules” series; a steel trussed fabric structure covered in premium PVC coated fabric. The steel framed structure h The Hercules structure was designed primarily to satisfy the industrial market need for a high quality, durable, industrial storage solution but has found utilization in Manufacturing, Mining, Oil & Gas, Mineral Storage, Remediation, Composting and Aviation.

The Hercules series has the following features:

Specifications

- Steel frame / Post fabrication Hot Dip Galvanized
- Width - 40' - 100'
- Length - Indefinite (20' modules)
- Height - 25' - 40'
- 22oz-24oz PVC-coated polyester scrim flame retardant fabric
- Designed to meet or exceed local building codes for all seismic and wind load requirements

Characteristics

- Modular, expandable
- 100% relocatable
- Unobstructed clearspan space
- Limited maintenance required
- Flat gable ends or rounded bell ends are available
- Rectangular floor plan for optimum usable space
- Snow shedding capabilities
- Can be environmentally controlled in virtually any climate
