Courthouse Inc. Fitness

Swimming Facility
Jackson, MS

"We love our pool! It's the best in the state. The entire crew was a pleasure to work with. I would recommend Universal Fabric Structures to anyone."

- Mr. Tom Williams, Treasurer
Courthouse Inc.

Background

The Courthouse Inc. Fitness Facility board of directors in Jackson, MS had a problem – their members wanted to use the swimming pool year-round, but the pool was an outdoor pool. Even in Mississippi there are days too cool to swim outside. The board needed to respond to the members with an idea that was quality built, cost-effective and able to be implemented and completed quickly.

Scope of Work

Realizing that both time and money were paramount to the Courthouse board of directors, UFS suggested erecting a 121-foot by 196-foot long polygon fabric structure over the existing swimming pool.

Solution

The board agreed and the entire structure was erected by a crew of five UFS employees in less than three weeks time.

The building is equipped with a total HVAC system to accommodate the chill of winter. Nine tempered glass retractable garage doors take advantage of the temperate breezes during the spring and summer.

Blue Ferrari fabric covers the building up to the eave joint with the balance of the fabric being translucent to take full advantage of the sun. Four electric ventilators and six passive louvers ensure good air transfer. Twenty-eight 400 watt lights brighten activities on overcast days and late into the night. "We love our pool!", said Tom Williams, treasurer of Courthouse, Inc. "It's the best in the state. The entire crew was a pleasure to work with. I would recommend them to anyone. UFS Project Management walked me through the entire project and kept me posted every step of the way," concluded Williams.

Echoing those accolades was Pool Director Laura Uecker, "The Universal crew was great to work with! We were so impressed with how fast it went up and how hard they worked. I enjoyed working with UFS and would recommend them to anyone."

The Polygon Sporthall fabric structure constructed for Courthouse was the first structure of its kind in the area and the community was amazed. The mayor of the town held a ribbon cutting ceremony to which the UFS representatives were invited.

The Polygon Series of structures is UFS' original structure design featuring a unique angled, low-profile frame. Engineered to optimize space with low peak height, the Universal Polygon has serviced a wide variety of applications from tennis court enclosures to compost processing plants.

As the need arises, the Polygon structure can be expanded by simply moving the gable end and adding more bays. Doors and other openings can be added anytime with minimal effort. The Polygon can be equipped with many of the same accessories found in standard construction, most of which are equally relocatable.

About Courthouse Inc.

The mission of the Courthouse is to make each member accountable to achieving a healthy lifestyle with proper training and healthy nutrition. "Remember fitness is not a trend, but a lifestyle change."

Courthouse offers a membership style for just about everyone. All memberships include access to comfortable locker rooms, wet areas, and an offering of activities to meet your needs. *Who do you want to be?*
