Pinelands Sports Center

Multi-Sport Facility
Southampton, NJ

"Pinelands Sports Center is a great venue for us to engage in sport activities all a year. The facility offers a state-of-the-art indoor playing experience and we are fortunate for it to be a part of our community's landscape."

- Mr. Jim Course, Vice President
Southampton Township Recreation Association.

Background

An indoor sports facility was needed to meet demand in the Southern New Jersey region.

Scope of Work

A 116' Wide x 260' Long SFS building erected and attached to existing brick and mortar style lobby area.

Solution

A tight budget and even tighter construction deadlines didn't deter Universal Fabric Structures of Quakertown from going the distance for the owners of Pinelands Sports Center in Southampton NJ, building the first high-tech, tensioned fabric structure for indoor sports activity to serve the South Jersey market. Pinelands Sports Center provides indoor play on state-of-the-art professional grade synthetic turf housed in a customized fabric and steel frame Sporthall™.

The Universal Fabric Structures team needed to implement construction modifications and take the conventional framework forward to retrofit the building's size and design. In order to accommodate the needs of Pineland Sports Center, the Sporthall fabric structure needed to be modified-for both budget and site constraints- down from a 120-foot standard width size to a 116-foot wide building. "The Universal team combined resources from sales, engineering and project management effectively and professionally to meet our exact needs" says Alex Samuelian, co-owner of Pinelands Sports Center.

That wasn't all.

The proposed fabric sport structure needed to marry an existing brick and stucco clubhouse facility in an open throughway so patrons could enjoy field play and have easy access to clubhouse amenities.

The facility is open for organized league play for team field sports including soccer, baseball, softball, field hockey, lacrosse and football. Youth and adult instruction clinics are available there, and the center is host to a variety of community events. Marching band and cheerleading practice, senior walks, coach practice and summer camps are also accommodated under roof at the 33,000 square foot indoor facility.

A 2,016 square foot concession area-the original brick and stucco building- includes rest rooms, a party and team room and concession refreshment area. The Pinelands Sports Center has been a hit with patrons. “The positive response has been overwhelming and we continued to be surprised by the unexpected attraction of groups in the community that are drawn to the structure” states Ed Fisher, co-owner of Pinelands Sports Center.

“Pinelands Sports Center is a great venue for us to engage in sport activities all a year. The facility offers a state-of-the-art indoor playing experience and we are fortunate for it to be a part of our community’s landscape” states Mr. Jim Course, Vice President, Southampton Township Recreation Association.

The product flexibility of Universal Fabric Structures, a provider of high-quality, cost-effective, engineered fabric building systems, stepped up to the needs of the Pinelands Sports Center to provide creative solutions to both the facility and the community’s needs.

Pinelands Sports Center is located at 3 Coleman Court Southampton NJ, roughly ¼ mile from the Red Lion Circle located a Routes 70 and 206 off Eayrestown Rd. For further information, visit their Web site at www.pinelandssports.com
